Profile

Extended Realities specialist with background in Systems and Computer engineering with over 8 years of research and work experience, focused in computer graphics and new immersive technologies.

Relevant Skills

Computer Graphics

AR/VR Development

Machine Learning

Awards and Recognitions

- 9 Awards for academic and research excellence
- Trained in 4 different research groups from top universities
- ERASMUS program student
- Founder of 2 companies

Current occupation

ERASMUS JMD - Master of Imaging and Light in Extended Realities.
MSc Optics, Image, Computer Vision and Multimedia

Objective

To create immersive, interactive experiences for users through AR/VR technologies as well as creating and integrating 3D models, programming interactive features and user interfaces. My goal is to create an engaging experience that immerses the user in a virtual or augmented world.

Summary of Experience

Developer on the AR/VR field
Experience in Computer Vision, Computer Graphics and Photonics
Research in multiple groups across Japan, USA, Canada and Colombia
Multiple Awards and Recognitions for high academic performance

Experience

IMLEX Quality Board Member // July 2021 - Present

Erasmus Mundus Joint Master Degree - IMLEX, Finland, France, Japan
Making strategic decisions for the program and overseeing its overall performance while implementing measures to enhance its appeal to prospective students.

Lead XR Developer // Jan 2019 - Aug 2021

Hackspace for Innovation and Visualization in Education (The Hive)
The University of British Columbia, Vancouver, Canada
Developed two mixed reality experiences that are currently being used by medicine students to learn about the brain through HoloLens1&2 (HoloBrain 3.0), and to practice clinical skills through a smartphone based simulation (Mr. Manikin / OCS).

Main Developer and Research Engineer // Feb 2017 - Sept 2019

Pontifical Xavierian University
Built a simulation for industrial engineers to understand the Material Requirements Planning. The faculty uses this software to teach students how to take correct business decisions, based on the results of the model.

Front-end Lead Developer // June 2018 - Dec 2018

Purdue University
Proposed an HTML and AWS based software based on open data.

Research Training

Visual Perception and Cognition @TUT (Japan) // Oct 2022 - Present

The Hive Research Lab @UBC (Canada) // Jan 2019 - Apr 2021

Ironhacks Research Fellowship @Purdue (US) // Aug 2018 - Dec 2018

Japanese

Computer Skills

Have worked in :

Computer Graphics	3D Modeling	Web Development
Machine Learning	VR / AR Development	Modeling and Simulation
Computer Vision	Photonics and Color	Software Engineering

Projects developed using:

Mixed Reality Toolkits	Unity Engine	C# / C++
ThreeJS / WebGL	Blender	JavaScript
OpenXR / OpenCV	SparkAR / Lens Studio	Python + libraries

Education

Master of Engineering - ERASMUS

Toyohashi University of Technology, Japan (2021 - 2023)

MSc in Optics, Image, Computer Vision and Multimedia - ERASMUS

University Jean-Monnet, France (2021 - 2023)

Master of Science in Computer Science - ERASMUS

University of Eastern Finland, Finland (2021 - 2023)

Software Engineering / Systems and Computer Engineering

National University of Colombia, Colombia (2013 - 2019)

Honors and Awards

MANUTECH SLEIGHT Scholarship and Certificate

University of Jean Monnet, France (2022)

Erasmus Mundus Mobility Award

University of Eastern Finland, Finland (2022)

Erasmus Mundus - IMLEX Consortium Full Tuition Scholarship

University of Eastern Finland, University of Jean Monnet, Toyohashi
University (2021)

Visiting International Research Scholar Fellowship

The University Of British Columbia (2019 - 2020)

Emerging Leaders of the Americas Program Research Scholarship

The Government of Canada (2019)

Purdue - UNAL IronHacks Research Fellowship

Purdue University (2018)

Best Highschool Graduates from Colombia Full Scholarship

National University of Colombia (2013)
